

Work Origin Story

Why you do what you do

Opening

Where you are, when you are and who you are with. What is a normal day or normal experience in this moment.

Problem/Issue

What is new or disruptive? What causes the next things to change? (This is likely the problem YOU are the solution to.) How do you notice it is an issue?

Help/Inspiration Comes

Help comes. You learn something. You read something that helps. A person comes to the rescue. A realization occurs. (This could be the START of how you got into this work - an experiment, a first step, an effort.)

Climax - Things start to get better

Things shift actually, emotionally, spiritually. There is relief, or the sign that relief will come, or success will come.

Meaning - Things start to get better

What is the enduring understanding or take away you have? Not at CTA. Consider what in you is affirmed in this work? Which of your values does it let you live out?
